INTRODUCTION

Publishing in the language is a creator of a block-based website. Using it does not require any programming skills. A comfort designer will help you create quickly, step-step, any design website and run it. The language can be created online - the online - site site, various blogs and email notifications.

In the language, the publishing house is located in the Russian Federation and its activities since 2016.

RESULTS AND DISCUSSION

The sites on the platform are equally suitable for mobile devices and computers. In order to convene users, there are also ready templates to create a site on language.com. In addition, using Zero Block editor, you can design your personal block from zero.

Registration is free and very easy to register on the language.com platform. No excess action is required. Account will be created by entering a personal e-mail address. This allows the registered user to use blocks that are sufficient to create a website and publish it. A limited number of services can be used without any fees.

Registration is free and very easy to register on the language.com platform. No excess action is required. Account will be created by entering a personal e-mail address. This allows the registered user to use blocks that are sufficient to create a website and publish it. A limited number of services can be used without any fees.

After turning a probationary period, it will be possible to select a paid tariff plan or continue using free use. All the work that creates during the 14-day probation is stored in a personal account. However, some features that are available only in paid plans are deleted in the event of non-payment.

According to the data, the use of paid services of the language is average per month, costing $ 15.[1]

If you pay, is it possible to transfer funds to the required tariff? "Of course there is!" Payments with Language ACOM are 100% per capita. If you have a similar problem, you can send a message to the email address of Team@illa.cc. Even if it is impossible to transfer payment to another tariff, it will return your money to you.

Nikita Obukhov is the founder of the Publishing platform in Language. Author of Professional Entrepreneur, several design and intensive courses. Nikita was born on September 30, 2001, now he is 20 years old.[2]

Obukov says the following words about the language.com platform: "Users create websites using pre-prepared blocks. This is not a template, so it is very convenient to change and adapt it. These blocks are created by our highly qualified designers."

The language was awarded several prestigious awards. 2016 - Bitrix Design Cup 2016 and "Promotional and equipment" in 2015 is worthy of the 2015 contest in 2015.[3]

He finances himself in the language and today has about 4,000 permanent customers.[4]

Alfred - Yangi Avlod Avtoservisi Bosh Direktori Maks Snigirev Tilda.com Haqida Quyidagicha Fikrlarini Aytib O'tadi: "Yangisini Yaratish Har Doim Yechim Topishning Eng Yaxshi Yo'lidir. Agar Siz ENG Moslashuvchan Vositalardan Foydalansangiz, Xuddi Shu Yechimni Topish Ehtimoli Ancha Yuqori BO'LADI. Tilda Ana Shunday Vosita."[5]

The platform is available to personal blogs and internet stores. However, as saying, "It is not a rice free," language has a problem in the language: the amount of entering data on all tariffs are strictly identified. The language currency is not designed to create complex sites because the size of such websites is growing regularly. Photos, videos, animations - today the audience is tools that attract people well. It is clear that their size cannot be small. Constant use of these materials is the amount of the size limit set for you to expire quickly. This can cause your project to stop. Undoubtedly, through the Publishing platform in the language, you can create beautiful mobs and print them. You don't have much more than you are required for it. It is advisable to create lending, Longrid, low-publishable personal blogs, small Internet stores with this platform.

Payments for tariffs can be made using Paypal, Robokassa, Cloudments, Alphabay, Stripe and other payment systems.

It is possible to create websites with the 500 pages in the language. This platform is well adapted to work with:

• Internet -Docommon;
• Landing;
• Longrid;
• special projects;
• Portfolio;
• Online training courses.

CONCLUSION
The main advantages of language:
1. The fact that there are extensive options.
There are many semi-finished templates in the language online platform that can meet modern style and design requirements.
2. High production capacity.

In the language, it cooperates with many technical apps for business, as well as a lot of technical tasks can also be performed with him.

3. If you can't find the need, place your own.

For example, in the process of using the language, if you can't find a picture, you can use the image you want to easily platform. There is a chance to place at the programming level of HTML code, which also expands the benefits of the curriculum in the language.

4. The universality of the format.

The site is automatically adapted to almost all mobile devices. You can use it through your personal notebook, tablet, mobile phone.

This is not all yet. In general, in the language, the Publishing platform in the language is equally suitable for developers, both the new student and professional designer.
